

EMSISOFT ANTI-MALWARE

ANTI-VIRUS + ANTI-MALWARE

2 SCANNING ENGINES + 3 PROTECTION LAYERS

TWO FULL SCANNING ENGINES

NOT JUST ANY SCANNERS BUT 2 WORLD CLASS PRODUCTS

Emsisoft's Unique Malware IDS technology provides a first line of defense against highly specialized attacks that steal your data and cannot be recognized by signature based Anti-virus software pair up with Bitdefender's best in class anti-virus engine.

STAY SAFE WITH THREE PROTECTION LAYERS

1- SURF PROTECTION: Blocks and prevents access to dangerous and fraudulent websites containing dangerous malicious code.

2- FILE GUARD: Emsisoft's File Guard not only checks all files that are downloaded and running, but constantly monitors the behavior of all programs against more than 10 million+ signatures of know malicious software. The Emsisoft Anti-Malware File Guard is intelligent and self-optimizes continually, so you won't feel the impact of dozens of files being scanned in the background.

3- BEHAVIOR BLOCKER: Emsisoft continually monitors the behavior of all active programs, to catch zero-day threats that aren't yet included in the signature database, and raises alerts as soon as something suspicious occurs to your PC. Combined with the live cloud-verification of the Emsisoft Anti-Malware Network it is the ultimate weapon against specialised and sophisticated malware attacks that others can't protect you from.
